1. Creams, pastes, powders - most made of sulfides; applied in form of paste; destroy visible hair (above skin); may destroy some skin also. Do not use too often; do not use on sensitive skin; wash off all paste thoroughly when through.

2. Plucking - removing with tweezer; not practical for large areas; uncomfortable.

3. Wax - plucking on large scale; warm wax is applied, allowed to dry, yanked off; uncomfortable. (over)

4. Abrasive - sandpaper or pumice stone; uncomfortable.
5. Shaving - with soap & water, razor; with brushless soap, razor; with electric razor; cheapest & least troublesome for removing hair from large area; does not make hair grow faster; does not make hair coarser, stiff & bristly.

NOTE * none of above methods remove hair permanently.

6. Electrolysis - expensive; not always safe; must be done by trained operator, taking great care.
7. X-ray - dangerous; not recommended.
